

Diabetes Study Day 16 May 2018

Hypoglycaemia Simulation Experience

This year we are pleased to announce we have two hypo simulation stations for the opportunity to experience first hand the effects of having a hypoglycaemic event via a virtual reality headset. Put yourself in the patient's shoes for five minutes and experience the blurred vision, disorientation, dizziness, and difficulty focusing that comes with a hypoglycaemic event.

Kindly indicate on registering for the Diabetes Study Day if you would like to be booked in for a five minute slot. Slots will be allocated on a first come first served basis and will run throughout the day. The simulation experience is based in the Education Centre at Hinchingsbrooke Hospital. You will be allocated a slot and a room on return.

Novo Nordisk have organised and remunerated faculty for the Hypo Hub on behalf of the Diabetes Study Day.
The Hypo Hub is non-promotional.
