Course overview-

This course will provide you with a thorough understanding of chronic oedema/lymphoedema which is the underlying problem in most patients with wet legs.

We will share with you newly developed management pathways for both chronic oedema and wet legs and through practical workshops consider various aspects of care.

The course will encourage you to think holistically and provide an opportunity to explore the role of health coaching and how you can encourage patient participation.

This course will contribute towards your CPD and we will provide you with a free lunch.

Target Audience- Community Nurses and Practice Nurses
