Other Clinical Policies

Policy Title	When is an Exceptional Case (EC) Funding Request Form Required?
Assessment of Haematuria (presence of blood cells in urine) in Primary Care (previously a surgical threshold policy, reclassified to a Clinical threshold Policy)	See directions relevant to Surgical Threshold referrals above.
Basal Cell Carcinoma Pathway	Complete an Exceptional/IFR funding request form if the patient deviates from the pathway.
Continuous Glucose Monitors	Exceptional funding required - complete an Exceptional/IFR funding request form.
Earwax Removal – Referral for	See directions relevant to Surgical Threshold referrals above.
Familial Breast Cancer	High risk patients only funded – all others require completion of an Exceptional/IFR funding request form.
Hydrotherapy	Where Hydrotherapy is not available locally patients should receive land-based physiotherapy.
Hyperhidrosis - Management of (previously known as the Botulinum Toxin Therapy for Hyperhidrosis Policy)	Group Prior Approval Form available here . Completion of Exceptional/IFR funding request form required where patient does not meet criteria.
Lymphoedema Services	Treatment available locally. Treatment of Lymphoedema by specialist units in the private sector require completion of an Exceptional/IFR funding request form and the involvement of appropriate local services.
Neurostimulation	Complete an Exceptional/IFR funding request form unless the indication is commissioned by NHS England.
Obstructive Sleep Apnoea / Hypopnoea Syndrome (OSAHS) in Adults – Diagnostic Investigations	See directions relevant to Surgical Threshold referrals above.

Pain Relief Services	Treatment in secondary care is via the commissioned service pathways. A request for treatment outside the commissioned service pathways is by Individual Funding Request.
Patient Self Management of Oral Anticoagulation	Complete an Exceptional/IFR funding request form unless covered by local commissioned service pathways.
Photodynamic Therapy for Age-Related Macular Degeneration	Group Prior Approval Form available here Complete an Exceptional/IFR funding request form where the patient does not meet criteria.
Podiatry Services (previously known as the Chiropody Services Policy)	Patients can be referred for podiatry where the patient has a high podiatric need or moderate podiatric need and a medical condition that increases their risk - see the policy for clarification. All other referrals require completion of an Exceptional/IFR funding request form.
Post Traumatic Stress Disorder	Complete an Exceptional/IFR funding request form for out of area referrals.
Pre-elective Surgery Referral for Stop Smoking Services: 'Stop Before Your Op'.	Patients who smoke and are to be referred for possible elective surgery are required to be referred by their GP or other referrer to stop smoking services. Note: there is no requirement for a patient to have stopped smoking, but contact with a stop smoking service (SSS) is mandated prior to surgery.
