DO NOT USE C&P NHS Health Check/ 2015

Administration | Risk Assessment | Risk Assessment Continued | Risk Management | Communication of Risk

### Communication of Risk

Ensure you are happy with the pre-populated information when using the QRISK2 screening tool.(this can be adjusted if necessary)

Information calculated via the QRISK2 tool **must be saved to the record** in order to enter the risk.

QRISK2 Calculator...

**CV risk is determined on the first cholesterol result. Any subsequent lowered cholesterol result (due to Statin therapy) should not be used to calculate CV Risk. The patient should be maintained on the High Risk Register if original CV Risk  $\geq$  20% or  $>$ 10% and on a statin**

Communication of Results  [edit] [dropdown] The person having the NHS Health Check should be told their BMI, cholesterol level, blood pressure and AUDIT score

Patient given results Card  [edit] [dropdown] Peterborough only if available

NHS Health Check programme (Notes field) [text area] [edit] Please enter any information you wish the patient to read in the NHS Health Check printout

Patient Given NHS Health Checks View  [edit] [dropdown] **Print Summary**

Completed view can be printed using the Print Summary button & selecting C&P Advice & Referral Centre GP Print Out +

Communication of CV risk  [edit] [dropdown]

Clinical management plan agreed / goals set [text area] [edit]

Settings **Print** Cancel

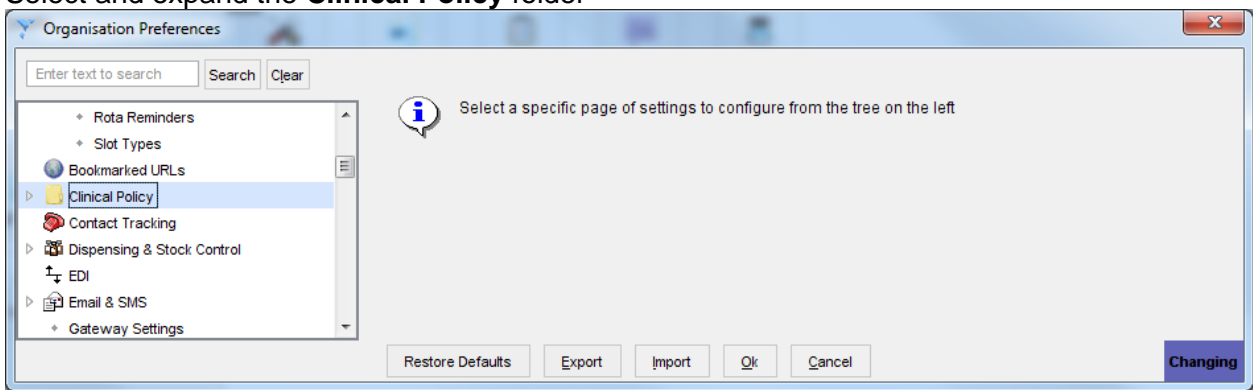

A Microsoft Word document will be produced which is to be handed to the patient

## How to add the C&P NHS Health Checks –PATIENT VIEW View to your clinical tree.

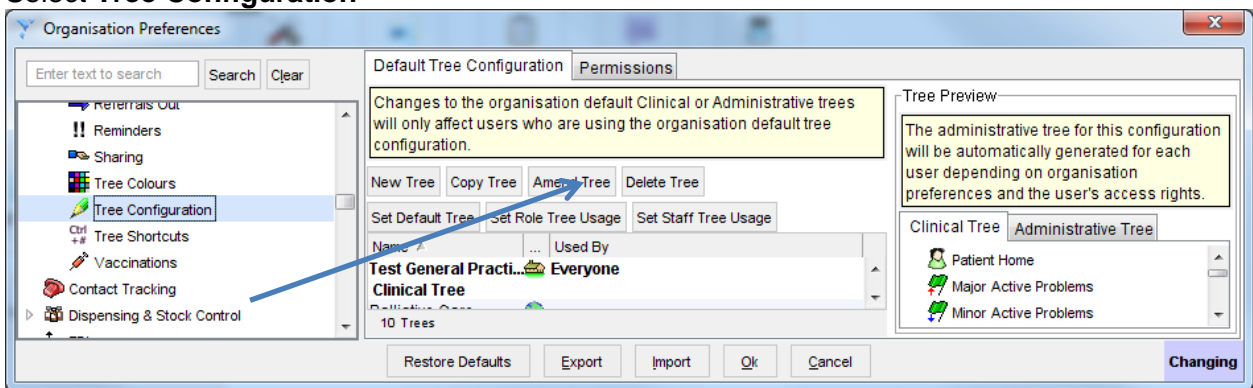

Access the **Setup** menu, and select **Users and Policy** then **Organisational Preferences**

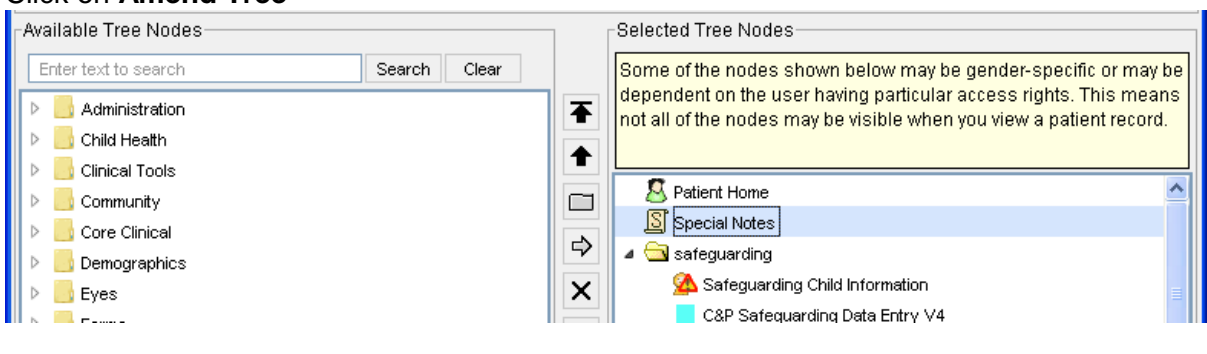

Select and expand the **Clinical Policy** folder

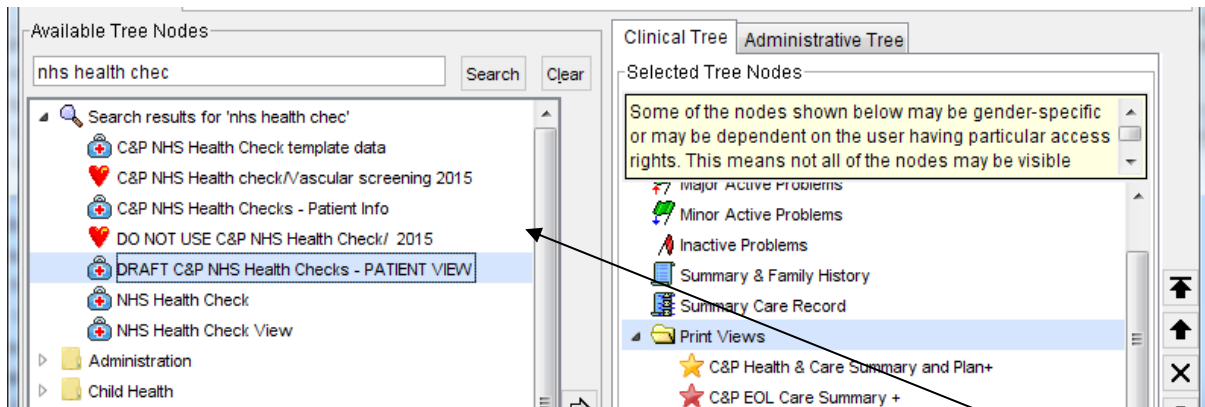

Select **Tree Configuration**

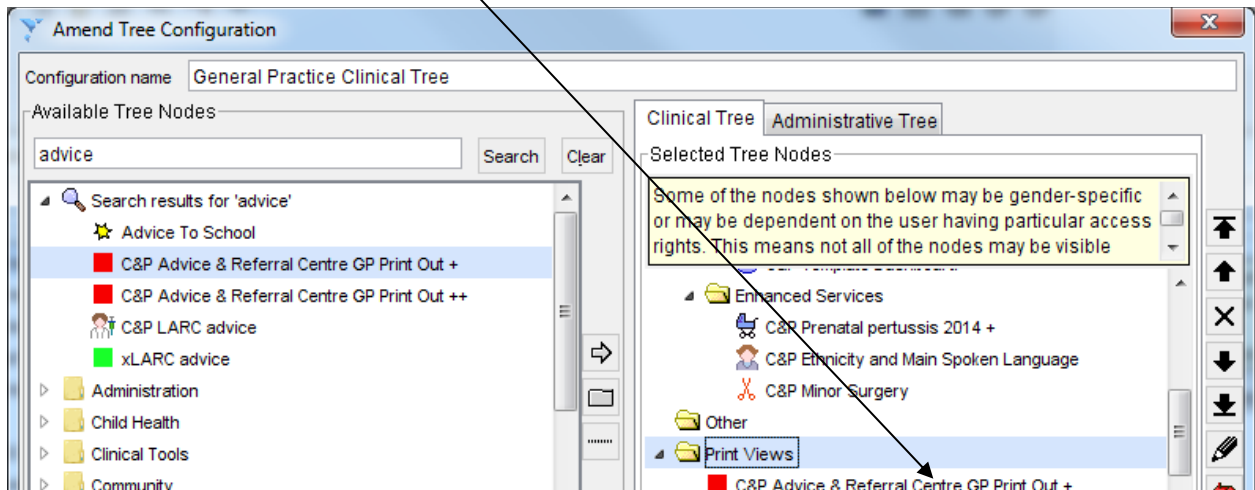

Click on **Amend Tree**

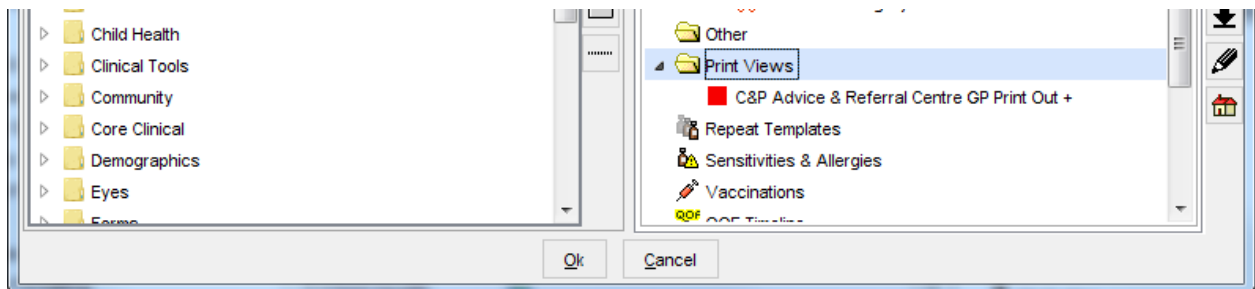

Under the selected tree nodes section right hand side of screen, highlight an area where you would like the view to sit (we would recommend that you add this to your 'Print Views' folder, if you have one).

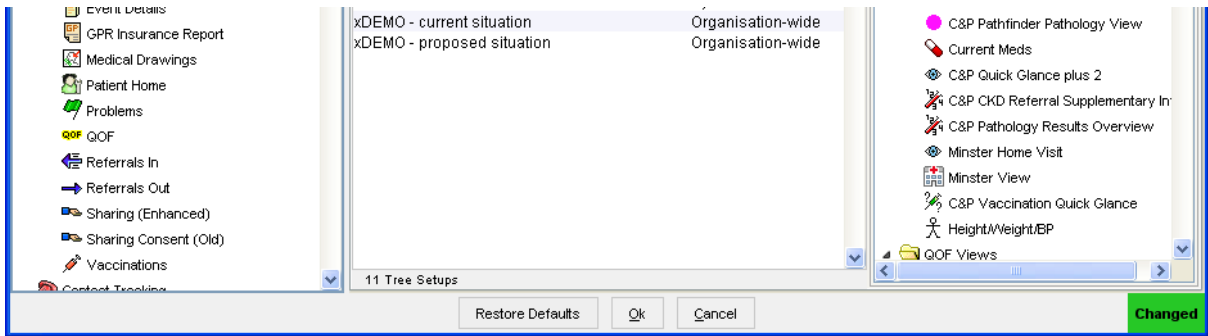

Type **nhs health check** into the **search field** (top left hand side) and select / highlight the result , press return . The view will then appear in the tree

Press OK at bottom of the screen.

Select Ok again at bottom centre of screen. The view is now visible on the Clinical Tree.
